PUBLICATIONS

1 Articles à paraître

1. M. Hosseinalifam, P. Marcotte and G. Savard
   “Network capacity control under a nonparametric demand choice model”
   à paraître dans Operations Research Letters

2. F. Gilbert, M. Anjos, P. Marcotte and G. Savard
   “Optimal design of bilateral contracts for energy procurement”
   à paraître dans European Journal of Operations Research

3. A. Kamgaing Kuiteing, P. Marcotte and G. Savard
   “Network pricing of congestion-free networks: the elastic and linear demand case”
   à paraître dans Transportation Science

2 Articles parus dans des revues avec comité d’arbitrage

1. M. Nasri, F. Bastin and P. Marcotte
   “Quantifying the social welfare loss in moral hazard models”

2. S. Sharif Azadeh, P. Marcotte and G. Savard
   “A Non-Parametric Approach to Demand Forecasting in Revenue Management”

3. F. Gilbert, P. Marcotte and G. Savard
   “A numerical study of the logit network pricing problem”
   Transportation Science 43 (2015) 706–719

4. S. Sharif Azadeh, P. Marcotte and G. Savard
   “A taxonomy of demand uncensoring methods in revenue management”

5. J. Guérin, P. Marcotte and G. Savard
   “$L^p$ Approximation of Univariate Concave Functions”
   JOTA 161 (2014) 490–505

6. F. Gilbert, P. Marcotte and G. Savard
   “Logit network pricing”

7. F. Gilbert, P. Marcotte and G. Savard
   “Mixed-logit network pricing”
   Computational Optimization and Applications 57 (2014) 105–127

8. S. Mirza Alizadeh, P. Marcotte and G. Savard
   “Two-stage stochastic bilevel programming over a transportation network”
   Transportation Research B 58 (2013) 92–105

9. P. Marcotte, G. Savard and A. Schoeb
   “A hybrid approach to the solution of a pricing model with continuous demand segmentation”
   EURO Journal on Computational Optimization 1 (2013) 117–142
   “Generating Efficient Solutions in Bilevel Multi-Objective Programming Problems”

11. L. Brotcorne, F. Cirinei, P. Marcotte and G. Savard
   “A Tabu search algorithm for the network pricing problem”

12. L. Brotcorne, F. Cirinei, P. Marcotte and G. Savard
   “An Exact Algorithm for the Network Pricing Problem”
   *Discrete Optimization* 8 (2011) 246–258

   “Solving Bilevel Linear Multiobjective Programming Problems”

   Clique Pricing Problem”

15. G. Heilporn, M. Labbé, P. Marcotte and G. Savard
   “A Polyhedral Study of the Network Pricing Problem with Connected Toll Arcs”
   *Networks* 55 (2010) 234–246

16. Y. Zhang, O. Berman, P. Marcotte and V. Verter
   “A Bilevel Model for Preventive Healthcare Facility Network Design with Congestion”
   *IIE Transactions* 42 (2010) 865–880

17. G. Heilporn, P. Marcotte and G. Savard
   “A Parallel Between Two Classes of Pricing Problems in Transportation and Economics”

18. P. Marcotte, A. Mercier, G. Savard and V. Verter
   *Transportation Science* 43 (2009) 228–243

   “Existence and computation of optimal tolls in multiclass network equilibrium problems”

   “Mathematical structure of a bilevel strategic pricing model”
   *EJOR* 193 (2009) 552–566

   “Joint Design and Pricing on a Network”

22. L. Brotcorne, G. Savard and P. Marcotte
   “Bilevel Programming: The Montreal School”
   *INFOR* 46 (2008) 231–246

23. S. Dewez, M. Labbé, P. Marcotte and G. Savard
   “New formulations and valid inequalities for a bilevel pricing problem”
24. B. Colson, P. Marcotte and G. Savard
   “An overview of bilevel optimization”

25. P. Marcotte and G. Savard
   “A Bilevel Approach to Optimal Pricing”
   Zurich Intelligencer (2007) 36–37

26. J. Guérin, P. Marcotte and G. Savard
   “An optimal adaptive algorithm for the approximation of concave functions”

27. J.-P. Dussault, P. Marcotte, S. Roch and G. Savard
   “A smoothing heuristic for a class of bilinear bilevel programs”

28. S. Roch, G. Savard and P. Marcotte
   “An approximation algorithm for Stackelberg network pricing”
   Networks 46 (2005) 57–67

29. B. Colson, P. Marcotte and G. Savard
   “A trust-region method for nonlinear bilevel programming: algorithm and computational experience”
   Computational Optimization and Applications 30 (2005) 211–227

30. B. Colson, P. Marcotte and G. Savard
   “Bilevel programming: A survey”
   4OR 3 (2005) 87–107

31. P. Marcotte, S. Nguyen and A. Schoeb
   “A strategic model of traffic assignment in static capacitated networks”

32. P. Marcotte and L. Wynter
   “A new look at the multi-class network equilibrium problem”

33. P. Marcotte, G. Savard and F. Semet
   “A bilevel programming approach to the travelling salesman problem”

34. Y. Hamdouch, P. Marcotte and S. Nguyen
   “Capacitated transit assignment with loading priorities”

35. Y. Hamdouch, P. Marcotte and S. Nguyen
   “A strategic model for dynamic traffic assignment”

36. J.-P. Côté, P. Marcotte and G. Savard
   “A bilevel modeling approach to pricing and fare optimization in the airline industry”

37. P. Marcotte and D. Zhu
   “A cutting plane for quasimonotone variational inequalities”
38. L. Brotcorne, M. Labbé, P. Marcotte and G. Savard
“A bilevel model and algorithm for a freight tariff setting problem”
Transportation Science 35 (2001) 1–14

“A trust region algorithm for nonlinear bilevel programming”

40. S. Dubuc, I. Kagabo and P. Marcotte
“Trivial cases for the Kantorovitch problem”
RAIRO Recherche Opérationnelle 34 (2000) 49–59

41. P. Marcotte and D. L. Zhu
“On the existence of solutions to the dynamic user equilibrium problem”
Transportation Science 34 (2000) 402–414

42. L. Brotcorne, M. Labbé, P. Marcotte and G. Savard
“A bilevel model and algorithm for a freight tariff setting problem”
Transportation Science 34 (2000) 289–302

43. J.-P. Crouzeix, P. Marcotte and Daoli Zhu
“Conditions ensuring the applicability of cutting-plane methods for solving monotone variational inequalities”

44. Y.W. Xu, J.H. Wu, M. Florian and P. Marcotte
“Advances in the continuous dynamic network loading problem”
Transportation Science 33 (1999) 341–353

45. S. Dubuc, I. Kagabo and P. Marcotte
“A note on the uniqueness of solutions to the transportation problem”
INFOR 37 (1999) 141–148

46. P. Marcotte and D. L. Zhu
“Weak sharp solution of variational inequalities”

47. S.Q. Wu, Y. Chen and P. Marcotte
“A cutting plane method for linear bilevel programs”
Systems Sciences and Mathematical Sciences 2 (1998) 125–133

48. P. Marcotte and D. L. Zhu
“Convergence properties of feasible descent algorithms for solving variational inequalities in Banach spaces”
Computational Optimization and Applications b 10 (1998) 36–49

49. M. Labbé, P. Marcotte and G. Savard
“A bilevel model of taxation and its application to optimal highway pricing”

“An analytic center cutting-plane method for pseudomonotone variational inequalities”

51. R. Séguin, J.-Y. Potvin, M. Gendreau, T. G. Crainic, and P. Marcotte
“Real-time decision problems: An operational research perspective”
52. P. Marcotte and S.Q. Wu
   “Finding the strictly local and $\epsilon$-global minimizers of concave minimization with linear constraints”

53. P. Marcotte and D. L. Zhu
   “Exact and inexact penalty methods for the generalized bilevel programming problem”

54. D. L. Zhu and P. Marcotte
   “Co-coercivity and its role in the convergence of iterative schemes for solving variational inequalities”

55. M. Gendreau, P. Marcotte and G. Savard
   “A Hybrid tabu-ascent algorithm for the linear bilevel programming problem”

56. P. Marcotte and D. L. Zhu
   “Global convergence of descent processes for solving non strictly monotone variational inequalities”

57. D. L. Zhu and P. Marcotte
   “Coupling the auxiliary problem principle with descent methods of pseudoconvex programming”

58. P. Marcotte and G. Savard
   “A new implicit enumeration scheme for the discriminant analysis problem”

59. M. Desrochers, P. Marcotte and M. Stan
   “The congested facility location problem”

60. P. Marcotte and J. H. Wu
   “On the convergence of projection methods: Application to the decomposition of affine variational inequalities”

61. D. L. Zhu and P. Marcotte
   “New classes of generalized monotonicity”

62. J. H. Wu, M. Florian and P. Marcotte
   “Transit equilibrium assignment: A model and solution algorithms”

63. D. L. Zhu and P. Marcotte
   “An extended descent framework for monotone variational inequalities”
   *JOTA* **80** (1994) 353–369

64. J.E. Fernández, P. Marcotte, S. Mondschein, J. Vera and A. Weintraub
   “Solution approaches to the bus operator problem”

65. P. Marcotte and D. L. Zhu
   “Modified descent methods for solving monotone variational inequalities”
66. J. H. Wu, M. Florian and P. Marcotte
“A general descent framework for the monotone variational inequality problem”
Mathematical Programming A 61 (1993) 281–300

67. P. Marcotte and G. Marquis
“Efficient implementation of heuristics for the continuous network design problem”

68. P. Marcotte, L. Zubieta and G. Marquis
“A Newton-SOR method for solving the spatial price equilibrium problem”
Transportation Science 26 (1992) 36–47

69. E. Fernández and P. Marcotte
“Operators-Users Equilibrium Model in a Partially Regulated Transit System”
Transportation Science 26 (1992) 93–105

70. P. Marcotte and Gilles Savard
“Novel approaches to the discrimination problem”

71. P. Marcotte
“Application of Khobotov’s algorithm to variational inequalities and network equilibrium problems”
INFOR 29 (1991) 258–270

72. P. Marcotte and G. Savard
“A note on the Pareto-optimality of solutions to the linear bilevel programming problem”

73. P. Marcotte, O. Drissi-Kaitouni and L. Zubieta
“Iterative methods for solving an equilibrium problem arising in transit deregulation”
Transportation Research B 24B (1990) 45–55

74. P. Marcotte
“To serve or not to serve: A badminton dilemma”
SIAM Review 31 (1989) 303–305

75. P. Marcotte and J.-P. Dussault
“A sequential linear programming algorithm for solving monotone variational inequalities”
SIAM Journal on Control and Optimization 27 (1989) 1260–1278

76. J.-P. Dussault and P. Marcotte
“Conditions de régularité géométrique pour les inéquations variationnelles”
R.A.I.R.O. Recherche Opérationnelle 23 (1989) 1–16

77. P. Marcotte
“A note on a bilevel programming algorithm by LeBlanc and Boyce”

78. P. Marcotte and J. Guélat
“Adaptation of a modified Newton method for solving the asymmetric traffic equilibrium problem”
Transportation Science 22 (1988) 112–124

79. P. Marcotte
“Un algorithme général de calcul de l’état d’équilibre d’un oligopole”
80. P. Marcotte
   “Algorithms for the network oligopoly problem”

81. P. Marcotte and J.-P. Dussault
   “A note on a globally convergent Newton method for solving monotone variational inequalities”

82. P. Marcotte
   “A note on Khilnani and Tse USA algorithm”

83. A. Haurie and P. Marcotte
   “A game theoretic approach to network equilibrium”
   Mathematical Programming Study 26 (1986) 252–255

84. P. Marcotte
   “Network design problem with congestion effects: A case of bilevel programming”
   Mathematical Programming 34 (1986) 142–162

85. J. Guélat and P. Marcotte
   “Some comments on Wolfe’s “Away Step””
   Mathematical Programming 35 (1986) 110–119

86. P. Marcotte
   “A new algorithm for solving variational inequalities, with application to the traffic assignment problem”
   Mathematical Programming 33 (1985) 339–351

87. A. Haurie and P. Marcotte
   “On the relationship between Nash-Cournot and Wardrop equilibria”
   NETWORKS 15 (1985) 295–308

88. P. Marcotte
   “Quelques notes et résultats nouveaux sur le problème d’équilibre d’un oligopole”

89. P. Marcotte
   “Network optimization with continuous control parameters”
   Transportation Science 17 (1983) 181–197

3 Actes de conférences avec comité d’arbitrage

1. Y. Bengio, N. Le Roux, P. Vincent, O. Delalleau and P. Marcotte
   “Convex Neural Networks”

2. M. Fortin, P. Marcotte and G. Savard
   “Pricing a segmented market subject to congestion”
   Proceedings of TRISTAN V (Triennial Symposium on Transportation Analysis) Le Gosier, Guadeloupe, July 13–18 2004
“A bilevel model for a network design and tariff setting problem”
Proceedings of TRISTAN V (Triennal Symposium on Transportation Analysis) Le Gosier, Guadeloupe, July 13–18 2004

4. P. Marcotte, S. Nguyen and K. Tanguay
“Implementation of an efficient algorithm for the multiclass traffic assignment problem”

5. P. Marcotte and D. L. Zhu
“An efficient algorithm for a bicriterion traffic assignment problem”
Proceedings of TRISTAN II (Triennal Symposium on Transportation Analysis) Capri, June 23–28 1994, 891–897

4 Chapitres de livre

1. P. Marcotte, A. Mercier, G. Savard et V. Verter
“Gestion du risque lié au transport des matières dangereuses : une approche basé sur la tarification”

2. P. Marcotte and M. Patriksson
“Traffic Equilibrium”

“Path-based Formulations of a Bilevel Toll Setting Problem”

4. P. Marcotte and G. Savard
“Bilevel Programming: A combinatorial perspective”

5. P. Marcotte and G. Savard
“A bilevel programming approach to Price Setting”

6. P. Marcotte and G. Savard

7. M. Labbé, P. Marcotte and G. Savard
“On a class of bilevel programs”

8. P. Marcotte
“Reformulations of a bicriterion equilibrium problem”
9. P. Marcotte and S. Nguyen
   “Hyperpath formulations of traffic assignment problems”
   Equilibrium and Advanced Transportation Modelling, P. Marcotte and S. Nguyen eds., Kluwer
   (1998) 175–200

10. P. Marcotte and D. L. Zhu
    “Equilibria with infinitely many differentiated classes of customers”
    Complementarity and variational problems. State of the art, J-S Pang and M. Ferris eds., SIAM
    (1997) 234–258

11. P. Marcotte
    “Advantages and drawbacks of variational inequality formulations”
    Variational Inequalities and Network Equilibrium Problems, F. Giannessi and A. Maugeri eds.,

12. P. Marcotte and M. Blain
    [“A Stackelberg-Nash model for the design of deregulated transit system”]

5 Livres

   Transportation and Network Analysis: Current Trends. Miscellanea in honor of Michael Florian

2. P. Marcotte and S. Nguyen, eds.
   Equilibrium and Advanced Transportation Modelling
   Kluwer (1998)
